

School Environmental Meeting

**Wednesday, August 4, 2004
7:00 pm, in the Church**

This parish meeting is being held to answer questions and concerns. We will have an epidemiologist from the Indiana State Department of Health and an indoor air specialist from the Marion County Health Department here to speak to us. We will also have our Environmental Committee made up of St. Pius parishioners who are physicians, a nurse, an Indiana Department of Health Director, and a member of the St. Pius Facilities Committee available for questions.

We hope that this meeting will be informative and reassuring to all.

Please try to attend.
